## IT'S TIME FOR THE SPRING SALMON RUN!

Help the salmon get home!

The salmon are ready to make the long journey from the ocean back to the river where they were born so they can spawn. Along the way, they'll face many obstacles:

Bears that want to eat them

Dams that block their way

Rivers and streams that don't have enough water

Pollution from farms and farm animals

Help the salmon swim from the ocean to the river where they were born. They only have one chance to make it home, so help them avoid all the things that are in their way!
