

## **Entiat Upper Burns Pre-Bid Zoom Meeting Directions:**

On Tuesday, February 16, 2021 from 9:00 – 11:30 AM, a Zoom video conference will be held to allow interested contractors to discuss the proposed Entiat Upper Burns Project with Yakama Nation Fisheries Habitat Biologist Chris Clemons, who is the Project Manager, and the Project Engineer.

**Please note that entry to the pre-bid Zoom video conference will be password protected.**

To be assigned a conference password all interested parties must contact Chris Clemons via email at:

[clec@yakamafish-nsn.gov](mailto:clec@yakamafish-nsn.gov)

Please specify “Entiat Upper Burns Zoom Conference Password Request” in the email subject line and provide in the body of the email all participant names and email accounts to which a video conference password and access directions should be sent. Two days prior to the scheduled meeting all contractors that requested an access password will be provided an email with instructions on how to join the Zoom video conference.

We encourage all interested contractors to attend this video conference as this will be the only opportunity to ask the project engineer questions directly before bids are due. No other site visits are planned. It is strongly suggested that anyone not familiar with a Zoom style meeting watch an online tutorial prior to joining the scheduled meeting as we will be unable to restart the discussion once it is underway. Zoom tutorials can be accessed at <https://support.zoom.us/hc/en-us>.

Please note that this project does occur on National Forest lands which are open to the public, so any contractor that wishes could visit the project site before producing bids, although this is not a bid requirement.
