

Lower Spring Creek Feasibility and Design

RFP Addendum dated 6/12/2020

Please note:

- This project is funded by the Washington State Salmon Recovery Funding Board (SRFB), "Fish Passage and Habitat Design on Spring Creek", Project #19-1551

- Specifications for SRFB's 60% design deliverable are listed in *Manual 18 Appendix D2* (pg. 90), <https://rco.wa.gov/wp-content/uploads/2019/05/SAL-Manual18.pdf>

- The Klickitat County Road culvert on Spring Creek Rd at (45.806350, -121.497522) will need to be evaluated during the design process and be made part of the preliminary design if the selected alternative changes the channel slope through the road crossing.

- A water right diversion is currently located immediately below the Klickitat County Road Culvert at (45.806350, -121.497522). Ideally, this point of diversion would not change.

- Klickitat County has another fish passage project downstream of the Lower Spring Creek Dam. Design documents are located on the project webpage at: <https://yakamafish-nsn.gov/request-proposals-lower-spring-creek-dam-fish-passage-and-engineering>
